

# Question-7-7.2-26

EE24BTECH11038 - MALAKALA BALA SUBRAHMANYA ARAVIND

**Question:**

The centre of circle is  $(2a, a - 7)$ . Find the values of  $a$  if the circle passes through the point  $A(11, -9)$  and has diameter  $10\sqrt{2}$  units

**Solution:**

Description	Given value
Centre	$(2a, a - 7)$
Diameter	$10\sqrt{2}$
point $A$	$(11, -9)$

TABLE 0: variables used

The radius of circle is  $5\sqrt{2}$

Let the centre of the circle be  $\mathbf{C}$

$$\|\mathbf{A} - \mathbf{C}\| = 5\sqrt{2} \quad (0.1)$$

$$\mathbf{A} - \mathbf{C} = \begin{pmatrix} 11 - 2a \\ -2 - a \end{pmatrix} \quad (0.2)$$

$$(11 - 2a)^2 + (-2 - a)^2 = 50 \quad (0.3)$$

$$a^2 - 8a + 15 = 0 \quad (0.4)$$

$$(a - 3)(a - 5) = 0 \quad (0.5)$$

$$\text{Therefore, } a = 3 \text{ or } a = 5 \quad (0.6)$$
